32 YEAR FOREST PRODUCTS MANUFACTURING VETERAN JOINS BOARD

BRUCE CRAIG JOINS LAMBOO TEAM FOR 2010

Lamboo, Inc. is proud to announce that Bruce Craig, 32 year veteran in the forest products manufacturing sector has joined our team. Craig retired from Weyerhaeuser Company in 2009, and has come on to represent Lamboo, Inc. and head up the product certification division for Lamboo at all ASTM International and ICC (International Code Council) meetings. His focus has been particularly in the area of product evaluations, code recognitions and manufacturing standards for development of the parallel strand lumber (PSL) and laminated strand lumber (LSL) products. “His experience and attention to detail are invaluable to moving Lamboo certifications forward” said President Luke Schuette.

Craig’s responsibility will be to write the standards needed for Lamboo LVB Structural grade material to meet all national and international certifications and practices. Craig and ASTM D 07.02.03 task group chair Luke Schuette are fore fronting the development of recognizable standards for the use of engineered bamboo as a new sustainable building alternative for the building products industry.

Craig has been a member of the American Society for Testing and Materials (ASTM) since 1988 and chaired the D07.02.03 section on Structural Composite Lumber from 1994 to 2009. He received the ASTM L.J. Markwardt Award in 2004 for his efforts in the development of standards for engineering use of structural composite lumber.

“I look forward to the opportunity to work with Lamboo and develop engineered wood products from an underutilized, renewable fiber resource such as bamboo. This is a great opportunity to bring Lamboo products to the structural building markets” said Bruce Craig, Director of Product Certification.

Lamboo, Inc. has taken the steps necessary to ensure it stays on the forefront of standardization of structural engineered bamboo building products. With the infrastructure in place and their efforts to remain an innovative company, Lamboo will be as sustainable as its products.
