

LAMBOO INTERIOR PRODUCTS: CARE AND MAINTENANCE DOCUMENT

NOTE: Reference specified stain/finish system manufacturer's technical data sheets for care and maintenance procedures beyond the following recommended procedures.

Product Lines Covered by this Document:

1. Lamboo® Surface™
2. Lamboo® Skyline™

Lamboo General Maintenance Procedures – Interior Grade Applications:

1. All finished materials installed in vertical and horizontal applications should be reviewed on an annual basis. Items to review are:
 - a. Surface Finish
 - b. Flatness
 - c. Color
 - d. Attachments (For product installed with mechanical fasteners)
2. For horizontal applications, avoid placing items that produce condensation or steam (cold glass of liquid, hot pizza box, etc.) directly onto surface of materials. Too long of exposure could reduce the protection of the finish used on the materials.
3. Be sure to keep materials out of direct sunlight due to the potential of sun bleaching or fading.
4. Dependent upon the application, dust may form on the product's surfaces and edges. The materials can be cleaned by using a warm damp cloth or even micro-fiber towels.
 - a. Note: Do **not** use aggressive cleaners or detergents to clean surface of materials. Some cleaners and detergents may remove the stain/finish from the materials. Refer to stain/finish manufacturer's technical data sheets in order to know what cleaners to use on the finish. Contact Lamboo to speak with a technical product specialist to assist with any questions in regards to the stain/finish used on the product.
5. Materials should be utilized in climate-controlled environments where the relative humidity is between 35% and 50% and the average temperature is between 65 and 75 degrees.

CARE AND MAINTENANCE UPDATES: Lamboo occasionally makes important updates to its care and maintenance documents. Please refer to Lamboo's website at www.lamboo.us to ensure you are referencing the most recent version of this document at the time of purchase.
